# AccellosOne Collect

## Extending Control of Your Inventory

**Empowering The Warehouse**

If your company is like most, the warehouse is where the action is. It holds your single largest asset. Additionally, it holds the keys to your overall customer satisfaction.

It is not just a simple spot to store inventory anymore. Your customers, vendors and partners are placing increasing demands upon you. They're looking for special packaging and handling, unique labeling to meet their requirements, electronic visibility into product movement and a limitless variety of other specialized requests.

At the same time, you're trying to do more with less. Tighten control on your inventory. Avoid shrinkage. Maximize the utilization of your labor force. Improve the accuracy of your shipments.

Seems impossible sometimes – especially when the only solution is complex software that might be more than your company can consume.

Accellos can help. We've built our Collect Edition to be that special blend of simplicity and sophistication that can enable your company to accomplish both of your goals – providing excellent customer service and controlling your overall costs.

**Available Anywhere**

AccellosOne Collect's browser-based design makes it simple to use regardless of location. We've made it very familiar and intuitive to learn how to manage:

- Order allocations
- Simple warehouse transfers
- Wave planning
- Management reporting
